Daily Routine Reference

Every Lesson Has These Components

1. **Phonogram flash review** — 2-5 minutes. Child sees card, says ALL sounds in frequency order.
2. **New learning** — Introduce ONE concept. Never two new things in one lesson.
3. **Spelling Analysis** — The heart of the lesson. 5-step routine (hear-segment-write-analyze-read).
4. **Reading practice** — Decodable words and sentences using known phonograms.
5. **Quick check** — Verify understanding before moving on.

Spelling Analysis (Every Lesson)

Step	Teacher	Student
1. Hear & Say	Say word. Use in sentence.	Repeat.
2. Segment	Hold up fingers (1 per sound).	Break word into sounds.
3. Write	Watch student write.	Write phonograms.
4. Analyze	"What rules? Underline multi-letter PGs."	Identify phonograms + rules.
5. Read	"Read it sound by sound, then blend."	Sound out, then blend.

Say-to-Spell (Stages 3+)

For any word with schwa: say word normally → pronounce with clear vowels → segment → write → read normally.

Troubleshooting Quick Reference

Problem	Likely Cause	Fix
Child can't blend CVC	Not enough PA practice	Return to Stage 1, lessons 6-7
Mixes up b/d, p/q	Visual confusion	Separate by at least 1 week; use multi-sensory tracing
Guesses at words instead of sounding out	Sight word habit	Go back to sound-by-sound; no guessing allowed
Can't remember phonogram sounds	Not enough flash review	5 min daily flash drill. Say ALL sounds each time.
Spells 'mak' for 'make'	Silent E not internalized	Return to Stage 3, lesson 3. Practice the reason.
Says /ā/ for 'a' in 'cat'	Taught short sound after long	Always teach ALL sounds from the start.
Reads robotically (no fluency)	Needs repeated reading practice	Use Stage 5 fluency passages; time and re-read.
Can't spell multi-syllable words	Not using say-to-spell	Model say-to-spell for EVERY schwa word.

Philosophy Reminders

1. **Speech-to-print, not print-to-speech.** Start with the sound, find the written form.

2. **Teach ALL sounds from the start.** Never say "a says /ă/" — always say "a says /ă/ /ā/ /ä/."
3. **Spelling drives reading.** Spelling Analysis is the core routine.
4. **No sight words.** Every word can be explained with phonograms and rules.
5. **Say-to-Spell is not optional.** Schwa appears in the majority of multi-syllable words. Without say-to-spell, the child cannot hear the spelling.
6. **Never skip phonemic awareness.** Even if the child knows letters, sound discrimination is the foundation.
7. **One new thing per lesson.** Never introduce two phonograms or two rules in one lesson.
